Preface

In today's medical world, Physiology is making so rapid progress that for an average student it is very difficult to keep in touch with the latest development in a short period of academic year.

To add to this University syllabi are included with objective type of questions for the examinations. So MCQ's are now part and parcel of various entrance and competitive exams run at the level of both Undergraduate and Postgraduate students.

To ease the complicated matter, here is an attempt made to draw MCQ's in Physiology including Biochemistry which will give the student a birds eye view of the whole subject and help him/her to pass the exam with credit.

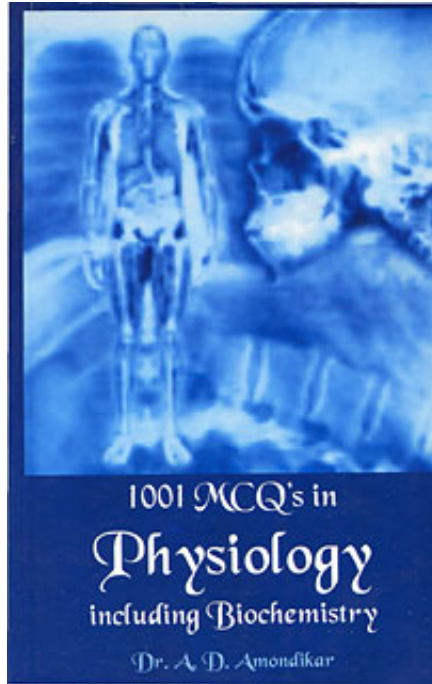

This book offers 1001 MCQ's in Physiology including Histology, Biochemistry and applied knowledge of the subject. MCQ's cover all the topics in syllabus for undergraduates. The MCQ's are drawn on the basic knowledge of the subject and its application in clinical practice.

This book will be very useful for various students appearing for entrance and competitive exams. This book will also be helpful for students of M.B.B.S, B.D.S., B.H.M.S., B.Sc., Physiotherapy.

The valuable suggestions by teachers and medical students are welcome as it will help to improve in future.
