PREFACE

Boenninghausen's *Therapeutic Pocket Book* has been used for more than a century by many masters of homoeopathic practice. If it has fallen into comparative disuse during the past few years it is because few of the younger generation of homoeopathic physicians have had a knowledge of its philosophic background and practical principles. It is not our purpose to set forth the superiority of any one general repertory over another; but it is our desire to demonstrate the sound philosophy and practical application of this work to such states as the physician meets in everyday practice. It is as nearly fool-proof as any repertory can be, once its principles are assimilated. In the following pages the statement is made that the book is not perfected; it has not grown to its full possibilities of usefulness; but the principles upon which it is based are sound and will allow further development and expansion without endangering those basic principles or distorting their balanced importance.

Let us utilize all the means at our disposal to insure to each patient the *simillimum*, which is his only hope of cure, and let us do so with the fullest possible comprehension of natural laws, and the application of those laws in practical form as they appear in our homoeopathic literature. Let us not forget that every man who has labored constructively for homoeopathy has built upon some law or definite guiding principle; if we will utilize these works we shall see the wisdom of the past flowering in the healing of the present.

Derby, Conn.
August, 1935.
