In unserer [Online-Buchhandlung](#) werden alle deutschen  
und englischen Homöopathie Bücher vorgestellt.

**Skin:** Hard and painful swelling of the glands.

**Sleep:** Sleep, with unquiet dreams, tears, talking, and hollow groans.

**Fever:** Chill, esp. in the afternoon, in the evening, and after eating. Excessive cold in the feet and in the hands in the evening. Nocturnal heat. Debilitating, and fetid sweat, esp. Sweat, which stains the linen a yellow colour.

---

## CARBO VEGETABILIS

**Characteristics:** The signs and symptoms of decay and putrefaction are the leading indications for its medicinal use : Decomposition of food in the stomach; putrid diseases and ulcerations; symptoms of imperfect oxygenisation of the blood. *Carb-v.* antidotes the effects of putrid meats or fish, rancid fats, salt or salt meats, and also the pathogenic action of *Cinchona*, *Lachesis*, and *Mercurius*. It is suited to conditions where there is lack of reaction (like Opium); where the venous system is engorged. In cases where disease seems to have been engrafted on the system by reason of the depressing influence of some prior derangement.

Aversion to darkness. Fear of ghosts. Coldness is characteristic : cold breath (as in cholera); cold knees; cold, but wants to be fanned. Lividity is a common indication; varicose veins of arms, legs, vulva. Pulse thready; face pale, covered with cold sweat; desire to be fanned. Haemorrhages are frequent; dyspnoea from chronic aortitis. In intermittents of long standing where quinine has been abused; thirst only during chill; feet ice-cold up to knees; heat in burning flushes. *Carb-v.* has weak digestion with enormous production of flatulence, > by eructations. Tinea capitis. Whooping-cough with pain at base of brain. *Dros.* is complementary to *Carb-v.* in this.

**Ailments from:** Alcohol. Bad food : eggs, wines, liquors, fish. Fat food. Butter. Salt or salt food. Poultry. Ice-water. Debauchery. Strains. Lifting. Over-work (asthenopia). Change of weather. Warm, damp weather. Hot air inhaled from fire. Overheating. Open air.

## SYMPTOMS

**Mind:** Fear of spectres, esp. at night. Timidity, irresolution, and embarrassment in society. Fixed ideas. Aversion to labour.

**Head:** Vertigo with nausea, obscuration of the eyes, trembling, buzzing in the ears, and even loss of consciousness. Headache from being overheated. Headache, with trembling of the jaw. The headache frequently extends from the nape of the neck to the brain, and is sometimes aggravated after a meal. Sensitiveness of scalp is < in the afternoon and evening, and after eating; < from taking cold, or when getting warm in bed.

**Eye:** Pains in the eyes, from fine work. Pains in the muscles of the eyes, on looking upwards. Black, flying spots before the eyes. Myopia. Insensibility of the pupil.

**Ear:** Ootalgia in the evening. Flow of fetid pus from the inner ear. Pulsations in the ears. Swelling of the parotids.

**Nose:** Obstruction of the nose, esp. towards evening, or serous flow, without coryza. Violent coryza, with hoarseness and rawness of the chest, tingling and tickling in the nose, and ineffectual inclination to sneeze. Frequent and continued epistaxis, esp. at night and in the morning.

**Face:** Face hippocratic. Swelling of the face and of the cheeks. Tetters in the face. Furunculi before the ear, and under the jaw. Red pimples on the face (in young persons).

**Teeth:** Toothache, provoked by taking anything hot or cold, as well as by food too salty. The gums recede from the teeth. Bleeding of the gums, and sockets of the teeth.

**Mouth:** Dryness of the mouth, without thirst. Tongue coated white or yellow-brown. Excoriation of the tongue.

**Throat:** Sore throat, as if from internal swelling. Pain of excoriation in the throat on coughing, on blowing the nose, and on swallowing.

**Appetite:** Salt taste in the mouth, and of food. Chronic dislike to meat, milk, and fat. Desire for salt food, or food sweetened with sugar. Great desire for coffee. After a meal, but esp. after taking milk, great inflation of the abdomen, acidity in the mouth, and sour risings. Great heat after drinking wine. Weakness of digestion; the plainest food inconveniences him.

**Stomach:** Nausea, esp. in the morning, after a meal, or at night. Cramps in the stomach. The pains in the stomach are aggravated or renewed by fright, opposition, a chill, as well as after a meal, or at night, and esp. after having taken flatulent food.

**Abdomen:** Pains in the umbilical region on it being touched. Much flatulency, esp. after a meal, and sometimes with sensation of torpor in the abdomen. Flatulent, cramp-like colic, even at night. Borborygmi and movements in the abdomen. Excessive discharge of flatus, of a putrid smell. He cannot bear any tight clothing around his waist and abdomen.

**Stool and Anus:** Constipation. Hard, tough, scanty stool. Discharge of blood from the anus with every evacuation. Large painful haemorrhoidal tumours.

**Urinary Organs:** Urine red, and very deep-coloured, as if it were mixed with blood. Constriction of the urethra every morning.

**Male Sexual Organs:** Extraordinary affluence of voluptuous thoughts. Smooth, red, and oozing spots on the glans penis. Itching and moisture at the thigh, near the scrotum.

**Female Sexual Organs:** Before the catamenia, cramps in the abdomen and headache. During the catamenia, vomiting and pains in the teeth, head, loins, and abdomen. Varices on the pudenda. Greenish and corrosive discharge from the vagina. Disposition to miscarriages. Inflammation of the mammae.

**Respiratory Organs:** Prolonged hoarseness, esp. towards the evening. Cough excited by a tingling in the throat. The cough is < in the evening; till midnight; from movement; when walking in the open air; from cold, wet weather : from going from a warm to a cold place; after lying; after eating and drinking; esp. cold things; from talking. Cold breath.

**Chest:** Laboured respiration and shortness of breath, while walking. Fits of suffocation caused by flatulency. The chest is tight, with a sensation of fulness and anxiety. Erysipelatous inflammation of the mammae.

**Neck and Back:** Rigidity of the nape of the neck, strain in back.

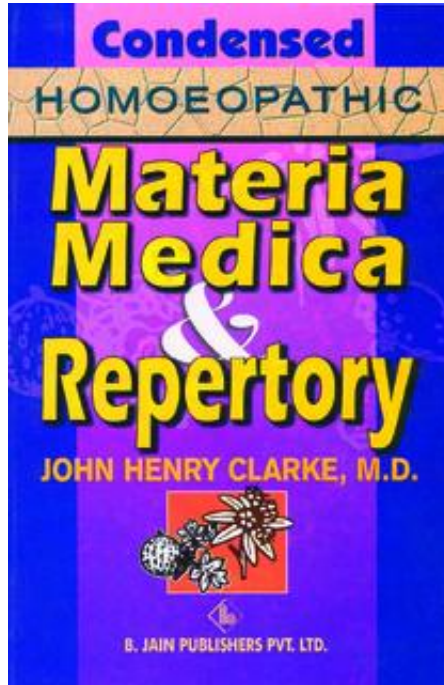

**Upper Limbs:** Relaxation of the muscles of the arms and of the hands, on laughing. Cramp-like contraction of the hands. The tips of the fingers are covered with cold sweat. Extremities of the fingers become ulcerated.

**Lower Limbs:** Strong tension and cramp-like pains in the coxo-femoral joints, the thighs, and the knees. Aneurism in the ham. Cramps in the legs. Perspiration of the feet. Senile gangrene, which begins in the toes and works all the way up the limb.

**Skin:** General itching in the evening, and on becoming warm in bed. Eruption of small pimples like miliary scabies. Fetid ulcers, with burning pains. Plexus of the veins, formed by a dilatation of the capillary vessels, with violent haemorrhage, after the slightest injury. Gangrenous spots from lying in bed.

**Sleep:** Strong inclination to sleep during the day, disappearing on movement.

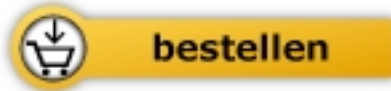

**Fever:** Fever with thirst during the cold stage only, or with profuse perspiration followed by shiverings. Febrile state with comatose drowsiness, cold sweat on the face and at the extremities, face hippocratic, pulse small and evanescent. Pulse, small, weak, imperceptible; uneven; intermitting. Cold sweat on the limbs and on the face.
