## **PREFACE TO THE FIRST EDITION**

Life today has become very risky. The misuse or improper use of scientific developments has made the life very insecure. Road accidents and accidents in the factory have become very common. Accidents can happen at any time causing deaths or crippling and deforming human body making a person handicapped. To help the injured the knowledge of the 'First Aid' is a must for every citizen.

Homoeopathy like all other systems of medicines has given very scientific but less painful system of treatment. Under homoeopathic treatment many have saved their organs from being amputated although it may sometimes become necessary to resort to amputation. It is well known that Symphytum and Calcarea Phos the two homoeopathic medicines have won their laurels in early knitting of bones. In this little book I have tried to elaborate the method of treatment of after effects of injuries along with homoeopathic therapeutics. Where required sketches have also been given to make the point very clear.

I hope this book will prove useful to those who are really interested in this field. Constructive suggestions towards the improvement of this book will receive my personal attention and will be taken note of at the time of further editions of this book.

Delhi

10th May 1983.

Dr. Y.R. Agrawal

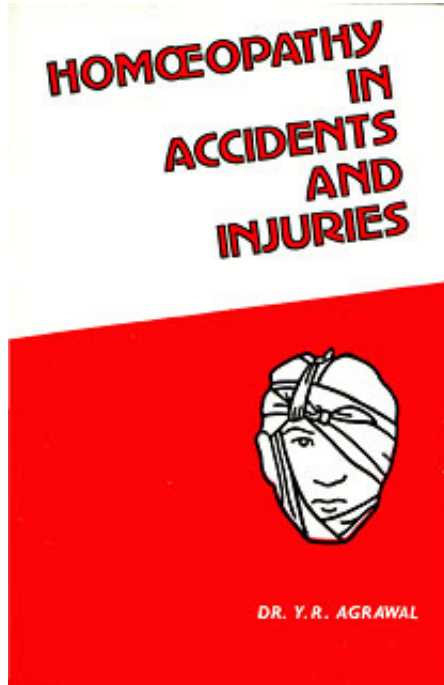

## **PREFACE TO THE SECOND EDITION**

The first edition of the book was well received by the profession. The second revised edition which is enriched with additional clinical tips in almost all the chapters will prove to be more of practical value. I am grateful to my readers who from time to time had been sending their concrete suggestions and I do hope that I will continue to receive the same cooperation in future.
