TABLE OF CONTENTS

Introduction seminar Dr. André Saine psychiatric patients 1991	1
a short biography	1
how it started	1
meeting the old teachers.....	2
back to the roots?.....	2
do we take enough time to study homeopathy ?	2
the homeopathic knowledge is diluted	3
start from the root	3
Hering's Law: a misconception?	4
Hering's law - the four principles:.....	4
how does psychosomatic disease fit in Hering's law?	4
how do we understand the law?	5
research	5
history	6
Andre Saine: I know the answer	6
Kent	7
did Hering's law appear out of the blue?	8
Hahnemann.....	8
Hering talks about a rule	9
the law seems to be a rule.....	10
how do we reach a prognosis?	11
do not believe, know!	12
clinical judgement calls	12
Homeopathy and psychiatry: the difficulties	14
facilities.....	14
put them away and drug them	14
violence.....	14
knowledge, experience	15
the mind-section is not up-to-date	15
shift in disease	15
now we deal with chronics, centred around the menta.....	15
provings only show the beginning of pathology	16
a lot of times we have to deal with extremes	16
defective cases	16
Homeopathy and psychiatry: the original provings.....	18
sometimes only some hints	18
developing materia medica	18
develop also the mind materia medica	19
pure observation.....	19
skip the fancies	19
to get subtle symptoms you need subtle provers	19
Hahnemann's position in psychiatry	21
Hahnemann was a hygienist.....	21
the introduction of kindness	21
the perception of a genius: similia.....	21
China and rabies - articles of great importance	22
Hahnemann's article about kindness	22
Lippes advice: read the organon	23
another discovery of Hahnemann: the importance of the mental symptom	23

II

be aware of the mental and emotional changes, also in the acute.....	24
Hahnemann's teaching about the cure of mental and emotional disease	24
Two different types of emotional and mental disease	26
most mental and emotional diseases are extensions of physical disease	26
this leads into defectiveness of the case	26
the transfer	27
return to the physical symptoms before the shift	28
the totality - a complete case	28
often in a mental or emotional case you will use the physical symptoms to decide on the remedy	29
case 1 h.C. Allen: "a case and its lesson"	30
you have to use objective previous physical and present mental/emotional symptoms.....	31
use deep-acting remedies and, for the exacerbation acute ones	31
get the timing right	32
a different mental illness - a different cure.....	32
how to differentiate	33
through pure observation decide to use homeopathy or psychotherapy.....	34
Psycho-somatic, Somato-psychic, Psychosis, Neurosis	35
psycho-somatic and somato-psychic disease.....	35
psychosis and neurosis.....	35
let belief change into knowledge	36
Hahnemann was the first to proclaim curability of mental illness	37
Prognosis	38
Jahr	38
functional versus organic	38
prolonged mental disease will lead into organic changes	39
prognosis regarding time	39
Grimmer	40
case by Grimmer	42
the elements of prognosis	43
case "insanity cure" by Buller	46
Julia Green about the improvement in mentally ill children	48
About temperaments	50
does the temperament change under homeopathic treatment?	50
Herbert Roberts about temperaments	50
Different views about treatment	52
Result comparison	53
can we compare homeopathy with other treatments?	53
about a tv program comparing 6 treatments	53
a book about the comparison.....	53
Henry Allen	54
Definition of Neurosis	55
psychosis/neurosis	55
division of mental disease is arbitrary to homeopathy	55
for homeopaths it is not all that important.....	56
homeopaths look differently - the disease process	56

Neurosis Anxiety, Fear, Phobia	58
neurosis is divided in three subcategories	58
- anxiety.....	58
- fear	58
- phobia	58
for fears and phobias you have to go beyond the repertory	59
duration of treatment depends on the timeframe and exposure	59
reliability of remedies in the rubrics	60
for instance: fear of crowds.....	61
Glonoin	61
Aconitum	61
Gelsemium	61
Nux vomica.....	62
Argentum nitricum	62
Arnica	62
anxiety, fear and phobias in practice.....	62
check the rubric with the materia medica	62
dreams or delusions	63
fear of fire.....	63
fear of blood	63
how to work with common symptoms	64
Obsessive compulsive disorder	66
obsession	66
compulsion	66
compulsion hitlist.....	67
- 1st: violence	67
- 2nd: religious obsession	67
- 3rd: contamination.....	67
- 4th: checking	68
high fever reveals what we are susceptible for.....	69
ocd needs years to develop	69
other ocd's	69
Rubrics associated with such disorders	71
monomania	71
thoughts, persistent	71
thoughts, tormenting	72
forgotten, feels constantly he has forgotten something	72
irresolution.....	72
confidence	73
fear of impending disease	73
fastidious	74
conscientious about trifles	74
doubtful; forgotten what has just done; memory, weakness	74
impulsive.....	74
impulse, morbid	74
fear to be left alone lest he should injure himself	75
kill, desire to	75
... barber wants to kill his customer	75
... to kill beloved ones	75
... the own child, ... beloved husband.....	75
... to kill herself, sudden impulse to	76
... with a knife.....	76

IV

... to throw child into the fire	76
... woman, irresistible, impulse to	76
mutilating his body	76
suicidal disposition	76
... throwing himself from a height	77
always washing her hands	77
fear of impending disease	78
guilt; anxiety of conscience; remorse; reproach herself	78
Cases	79
ten cases	79
case 1: gw 25 years old, female teacher.....	79
potencies	84
Potencies	86
example about potencies	86
simillimum.....	87
aggravation	87
suicide	87
example of aggravation of destructiveness	88
example of suicide	88
an aggravation can occur in every type of disease	89
over the years of treatment you must be able to go higher	89
sensitivity, vitality, age	89
acuteness of the problem	90
restart the potencies.....	90
Skinner, Finke, Korsakoff, LM	90
which one came last and which one is more life-threatening	97
placebo/macebo	97
case 2: JM 47, father of GM	100
a grief case	106
what do you do when not all the symptoms fit?.....	110
long-standing disease often needs more than one remedy	110
Boeninghausen	110
the materia medica is never complete.....	111
do not try to predict	112
treating a relapse	114
dry bottles.....	114
electro-convulsive-treatment, ect	114
the importance to know where disease started	116
- is it a curative process?	116
- prognosis, environment, susceptibility	116
- it helps to find the remedy	116
discussion about looking at the whole picture	117
case 4: PM 16, brother of GM, son of HM and JM, student	118
what is the action of a remedy?.....	120
case 5: LM 11, sister PM and GM, daughter of HM and JM.....	121
case 6: JM 11, twin brother of LM, brother of PM and GM, daughter of HM and JM.....	123
case 7: YM 8, sister of LM, PM and GM, daughter of HM and JM	124
case 8: girl 7 years, sister of YM, LM, PM and GM, daughter of HM and JM .	124
case 9: YM 2, son of GM	124
follow-up of the last three (YM, the little girl and YW)	125
the remedies in the family.....	126

Teaching and studying Materia Medica	127
branches in homeopathy	127
Hering: how to study materia medica, the diagnostic method	128
start with the original proving	129
 The importance of Hahnemannian Homeopathy: Pure Mat. Med.	131
 Materia Medica of Argentum Nitricum	133
first aspect: an obsessive, impulsive state	133
- example about fixed ideas-	133
- offended easily	134
- anorexia nervosa	135
- easily influenced	135
- example of an impulsive, compulsive state	135
- worse outside	136
- fear of buildings	136
- desire to jump when seeing emptiness	137
- tends to be hypochondriac	137
- delusions	137
- example: familiar things seem strange	137
- seeing frightful images on closing the eyes	138
- cannot be successful in anything	138
- contrary	138
- impulse to do things	139
second aspect: hurriedness	139
third aspect: apprehension	140
fourth aspect: shyness	141
- lost voice in singers	141
- stage fright	142
- shyness	143
- deceitful	143
objects of fears	144
- high places	144
- claustrophobia	144
- being alone at night	144
- fear of having a disease	145
- predicts time of death	145
- fear of insanity	145
- lack of self-confidence	145
additions to the repertory	146
the body	146
face	146
food cravings: sweet, salt, ice-cream, fat	146
restlessness of limbs	147
insomnia	147
complements and follows well	147
psychosis or neurosis?	147
anguish	148
 Silicea	149
no symptoms, low energy	149
shyness	149
fixed	149
pins?	149

case: woman searching for pins.....	150
was this the only case about pins?	150
fear of sharp objects.....	150
symptoms from Hahnemann's proving	151
Thea	153
Thea is tea, impulses.....	153
Antidotes	154
when to act on morbid impulses	154
treatments other than homeopathy.....	155
antidotes	155
to antidote with coffee will not work most of the times	157
Placebo	158
active/inactive placebo	158
Psychotherapy and Homeopathy	160
dynamic suffering needs a dynamic therapy.....	160
psychotherapy as a friend	161
if the origin is not dynamic, psychotherapy might be helpful	161
homeopathy even with traumas like rape and incest.....	162
the efficiency of homeopathy	162
Recovery, Palliation and Suppression versus Cure	163
recovery and cure.....	163
treat acute disease to unlock psora	163
antibiotics	164
Cure	165
cure is holistic	165
permanency . ,	165
Treat dynamic disease with Homeopathy	166
hypersensitive	166
example of a hypersensitive patient	166
repeat as needed	168
Thuja	169
stuck on little details	169
preoccupation	169
depersonalisation	169
presentiment of death.....	170
guilt	170
details.....	170
aversion to touch fixed ideas	171
.....	171
Medorrhinum	172
.....	172
Medorrhinum and Argentum nitricum are very close.....	172
sensation that somebody is behind them	172
confusion of the mind	172
Medorrhinum will be more compulsive	173
Medorrhinum is more compulsive	173

Staphisagria	174
a controlled remedy	174
sexual thoughts	174
broods	174
dwells, dd Natrum muriaticum	174
Compulsive behaviour	176
anorexia	176
case from 1912 of miss p. anorexia	178
gamblers	181
pyromaniacs	181
some behaviour is cultural	182
kleptomania	183
trichotillo mania	183
Hysteria	184
where does the word come from	184
it is not intentional	184
somato-form disorder	184
hypochondriacal	185
rubrics for hysteria	185
case: hysteria	187
hysterical pregnancy	189
hysterical headaches.....	189
hysterical hyperventilation.....	189
loss of voice, cataleptic trance.....	189
feigning sick	190
dancing, whistling, singing	190
delusions	190
case: a single case of hysteria from 1898	190
Tarentula	193
materia medica.....	193
restlessness, agitation	193
case: a newborn.....	194
destructive and violent	196
Kent's experience with tarentula.....	196
sudden fits of destruction	197
threatening	197
doesn't like touch	197
superhuman strength	197
sudden fits, cunning, deceitful, quarrelsome, industrious, abrupt speech . . .	198
amelioration from music	198
aggravated from fright and grief	198
aversion to certain colours?	199
a rotten spider	199
Bits and pieces	200
other remedies associated with hysteria	200
Moschus	201
spasmodic contraction, globus hystericus	202
fear of death	202
angry during fits of hysteria	202

sexuality	203
Asafoetida	204
globus hystericus and burping	204
apprehension	204
suppressed discharge	204
Valeriana	205
it is a bit like coffea	205
oversensitive	205
delusions	205
anxiety and fear	206
case: difficulty in finding the remedy	206
any remedy can be neurotic	207
Good practise	208
the ingredients	208
good case-taking is 50% of the work	208
grades in homeopathy	208
Step one case-taking	210
1st step: avoid leading questions	210
2nd step: maintain objectivity at all times	210
3rd step: keep good records	211
- quote the language of the patient	211
- write down all the important information	211
- underline for intensity	211
- start with the chief complaint	212
- physical general	212
- mind	212
if there is no confidence in you, you are doing something wrong!	213
- observation and third parties	213
lead the interview for the chief complaint and the physical generals	214
for the mentals let the patient lead	214
pay attention to the first things they mention	214
anything else?	215
ask the accompanying people if they have something to add	215
don't interrupt in the beginning	216
if a patient does not know the answer	216
open/direct, single questions	216
checking: sensitive to	217
- situations and conditions	217
- anxiety, fears and phobias	217
- if necessary: ask about the past or about specific fears	218
- confidence	218
- shyness and others	219
- how are you to make decisions?	219
- fainting	219
- guilt and others	219
- temperament	220
- violence	220
- destructive	220
- resentment, hatred	220
- jealousy and envy	221

IX

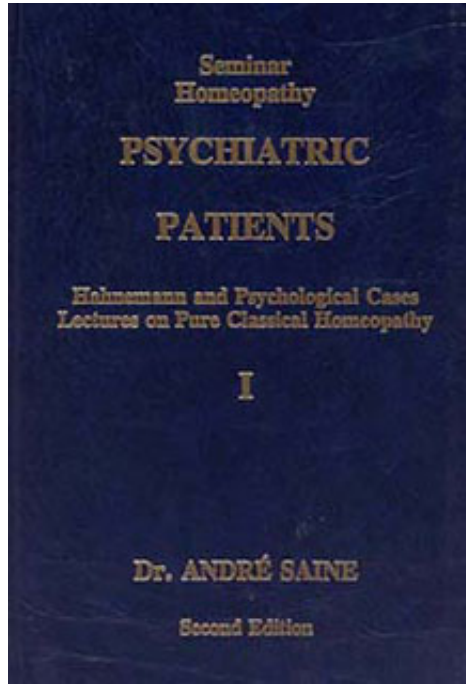

- affection	221
- dictatorial	221
- difficulties in life	222
- greatest sorrow.....	223
- how do you bear	223
- If the patient is still closed	223
- pay attention to their eyes	224
- if they don't want to tell	224
example: wants to kill	224
you can skip a question	225
what do you think when you are alone?	225
brooding, dwelling and others	225
sadness, depression, living, work, death, suicide	226
example: wishes to commit suicide	226
patience and conception of time	228
impulsive	229
memory, mistakes, confused	229
fancies, imaginations.....	229
aversion and cravings	230
sexual desires.....	230
- what is normal sex?	231
- example: too much.....	231
- sexual dreams	232
- homosexuality.....	233
aversion to men or women.....	235
concomittants	235
childhood.....	235
aetiology	235
case: from 1901	235
family history	236
objective symptoms	237
- frowning	237
- gestures	238
- stammering	238
- posture, restless legs	238
- answering	238
weeping alternating with laughter	239
loquacity	239
example: threatening	239
example: loquacity	239
- censorious, critical, sarcastic	240
- weeping	241
- laughing	241
- whistling	241
- self-esteem, egotism, selfishness, haughtiness	242
- suspicious	242
example: suspicious 2.....	242
- third parties	243
tricks .	244
the conscious and the hidden how do I deal with this?	244
	245
Repertory	
248	
first rule: confirm everything with the clinic.....	248

second rule: any remedy can cure anything as long as it fits the case	248
language of the repertory	249
about the logic of the repertory	249
changes in the repertory	250
difficulty in finding a symptom.....	250
history of the repertory	251
Kent's work	251
additions	252
additions should be proved and confirmed	252
reliable reporters	253
Lippe talked about how to write a repertory	253
publish the good cases	254
validate a symptom by confirming	254
How to manage cases with rape or incest	255
example: traumatic shock	255
example: memories coming back	256
example: incest	257
mental retardation	258
reliving the past	259
dreams	259
fancies, ideas, thought and delusions	259
Psychosis	261
case: acute attack of mania in a hypersensitive patient	261
Melilotus	269
congestion	270
proving	270
new remedies	271
melilotus: dark red face with epistaxis which > headache	271
extremely violent headaches	271
migraine before a storm	271
migraine > lying down with head low.....	272
migraine > profuse urination	272
insanity, violent type of mania	272
mania triggered by being threatened	273
insanity from grief.....	273
sleepless during insanity	273
anorexia and restlessness during insanity.....	273
with fists closed	273
gets drunk during the attacks	273
loquacity	274
fear of police	274
suspicious that someone will poison them	274
desire to run or hide	274
fear of danger	274
violence	275
example: running about (lachesis)	275
whispers	275
eats dung	275
does not recognise his friends	276
they feel the devil is in them	276
no mental capacities and lazy	276

periodically every three or four weeks	276
< 3 p.M. And 3 a.M	276
summary	276
confirmed proving.....	277
Derris Pinnata	278
desire to kill their loved ones	278
Psychosis and Schizophrenia	279
psychosis	279
schizophrenia	279
Rubrics for Psychosis and Schizophrenia	280
insanity	280
dementia	280
confusion	280
the meaning of a star in the synthetic.....	280
delusions.....	280
other rubrics	281
example: ankylosis spondylitis	282
delirium	282
example: wants to go home	283
example: coma, while answering correctly	283
example: palliate in serious disease	285
mania	285
violence.....	285
rage.....	285
paranoid.....	285
- fear.....	286
- persecution.....	286
case: paranoia.....	286
example: suspicious after snakebite.....	288
Manic depressive disorder.....	291
how to manage drugged patients.....	291
let the prescriber reduce the medicine as they recover.....	292
if drugged, the remedy will act shorter.....	293
is there a difference in treating undrugged psychotic patients?.....	293
example: sedated patient.....	294
- you need to know the side effects of the drug	294
manic depression in climacteric state.....	295
you can make a prognosis after the first follow-up.....	295
example: schizophrenic.....	296
posology.....	296
Manic depressive psychosis.....	298
rubrics.....	298
description.....	298
more rubrics	299
prognosis	299
example:	300
take a long time to remove the drugs.....	301
poem by Hahnemann.....	301

XII

Rubrics for Psychosis	302
a correction by Kent	302
and more rubrics	302
Hyoscyamus	303
example: the dog-boy	304
ailments from fright or shock trigger psora	305
example: the parrot-girl	305
the simillimum will cure	307
still more rubrics	307
case: by a doctor from new york in 1883	308
case: from 1932, mania	308
Belladonna, Stramonium, Veratrum, Hyoscyamus	310
Belladonna	310
Hyoscyamus	310
Stramonium	311
case: Lippe, clinical reflections	312
Cantharis	316
example: Cantharis	316
difference Lyssinum and Cantharis in an acute mania case	316
case: a little psychiatric study	317
return of an old susceptibility or suppressed symptom	321
a possibility to cure psora	322
Veratrum	324
religious	324
insulting	324
haughtiness	324
lasciviousness, kisses everybody	325
other symptoms	325
destruction	325
religious haughtiness	325
the outburst don't last long	326
hysterical pregnancy	326
religious despair	326
Depression	327
more rubrics	328
and more	328
laziness of the lac's	329
and more rubrics	329
manage the suicidal patient	330
suicidal disposition	330
other rubrics	331
Lecithin	332
Lecithin, the Arnica of the mind	332
and more rubrics	332
case: whitmond, depression	333
Kali Phosphoricum	336
