ADRENALIN (Sarcodé)

Extr. of Suprarenal bodies

C3H3A2O1

Mind.—Despondent and nervous ; lack of interest in anything ; no ambition ; disinclination for mental work ; absence of "grit."

Aversion to mental work, cannot concentrate thoughts.

Head.—Hot headache in left side, extending to right, < by reading and in morning, with a feeling as though the eyes were strained.

Frontal headache, supraorbital, with congested nose and eyes.

Burning heat in head, feeling as though he wanted to open eyes wide.

Headache extending all over head but < on left side and over eyes across forehead.

Severe pain > by pressure on the eyes.

Headache extending to the ears. All headaches are < in the afternoon or evening ; in the evening they appear about 7 P.M. and last until relieved by walk in the open air or sleep.

If headache appears in the afternoon the time is 3 P.M., always > by walk in the open air, and some-what relieved by eating and -sleeping, but not so completely as by walk in the open air.

Neuralgic headache ; pains start from base of brain, go forward over the head to front and sides ; pains are first shooting and seem to be just under the scalp, appear at 11 A.M. and last until 3 or 4 P.M. and disappear by eating, in open air, < in close, warm room.

Dull aching in the eyeballs with headache, > by pressure and by rubbing the eyes.

Headache coming on at 11 A.M., lasting until 12.30 at night, > by eating.

Dull feeling in the head from 3 to 6 P.M.

Eyes.—Strained feeling, congested, feeling as though he wanted to open them wide or press upon them.

Adrenalin

Hematuria with severe pain in the renal region ; cured.

Urine more frequent than usual.

Sexual desire increased, without erections.

Erections ; lascivious dreams all night causing waking from sleep.

Emissions in early morning without any bad effects.

Respiratory.—Cough, from irritation in suprasternal fossa.

Increase of respiratory movements, soon followed by suffocation and death from paralysis of medulla and pneumogastric (crude drugs).

Back —Pain especially on the left side ; better by sitting up straight or lying straight.

Extremities.—Slight rheumatic pains coming and going down leg.

Arms and legs go to sleep easily ; numbness and tingling from below upwards.

Corns on the toes.

Rheumatic pains in left elbow and little finger on waking.

Legs tired and ache, especially in the calves and below the knees.

Ankles feel weak and tired.

Painful swelling on first finger of right hand, resulting in a felon.

Tired aching in arms and legs on waking.

Tissues.—Prolonged contraction of the general muscular system. Repeated injections cause atheroma and heart lesions in animals.

The skin becomes bronzed ; great loss of strength ; rapid emaciation ; exceedingly rapid pulse ; irregular intermitting heart beats ; general marked *araemia*.

Sleep.—Great sleepiness and drowsiness.

Dulness and sleepiness from 3 to 6 P.M.

Thyroidin

Very excited ; excited state followed by considerable depression.

Irritable and ill-tempered.

Became a grumbler.

Angry.

Had frights.

Head.—Vertigo.

Feeling of lightness in the brain, scarcely amounting to giddiness.

Much giddiness and hea tache for twenty-four hours.

Awoke about 4 A.M. with sharp headache and intense aching in back and limbs, which continued for three days and compelled him to keep his bed.

(Constant headache, pains in occiput and vertex.)

(Headache in case of acromegaly.)

Headache.

In one case of scleroderma and one case of myxedema the hair fell off permanently.)

In a case of myxedema the patient lost all the hair of his head and face and had a thick growth over his arms and thorax; under Thyr. The hair of the head and face grew again and that of the arms and chest fell off.

Eyes.—(Prominence of eyeballs—exophthalmic goitre).

Optic neuritis (in five persons, four of them women, under treatment for obesity ; no other symptoms of thyroidism).

Accommodative asthenopia.

Ears.—Moist patches behind ears heal up (case of psoriasis). Hyperplastic median otitis with sclerosis and loss of mobility of the ossicles (rapid amelioration—several cases).

Face.—Flushing ; with nausea and lumbar pains ; loss of consciousness, tonic muscular spasms ; immediate with rise of temperature, and pains all over ; suddenly became breathless and livid.

Proving of the X-Ray

Upper Extremities.—Rheumatic pain in left wrist and forearm.

Rheumatic twinge in last two phalangeal articulations of index and middle fingers for a short time in fore-noon.

Grating heard in shoulder joints, as well as nearly all other joints of the body.

Rheumatic pain in right wrist and arm.

Can't hold things in left hand, powerless or clumsy.

Palms of hands, which were rough and scaly and bleeding at times, became smooth and natural during the proving. Healing action. (Afterward they went back to former state when general health improved.)

Lower Extremities.—Lower part of both legs asleep, tingling as if from electric battery more in right, immediately.

Sciatic pain in right hip.

Rheumatic pains in limbs.

Dull aching posterior aspect of thigh and calf in morning, from above downward.

Pain in right sciatic nerve on walking.

Rheumatic pains in front of right thigh.

Drawing aching discomfort in right thigh through hip and knees down through toes, immediately.

Feeling as if somebody were drawing icy hands over thigh downward, aggravatingly slow. (This occurred first twelve years ago after a nervous shock and did not return for five years.)

Rheumatic-like fever in trunk, steady dull pain going steadily down to legs and finally to heels, worse in left knee, worse stepping on heel, on underside of heel (old symptoms of inflammatory rheumatism twenty-five years ago).

Fever — Chills as soon as beginning to sleep, running up back, preventing sleep.

Chill going down back, followed by paralytic feeling in right cheek.

Wave-like sensation as if it would break out in perspiration.

Profuse perspiration on getting into bed, keeping him awake.
