In unserer [Online-Buchhandlung](#) werden alle deutschen und englischen Homöopathie Bücher vorgestellt.

[Narayana Verlag](#) ist ein Verlag für Homöopathie Bücher. Wir publizieren Werke von hochkarätigen innovativen Autoren wie [Rosina Sonnenschmidt](#), [Rajan Sankaran](#), [George Vithoulkas](#), [Douglas M. Borland](#), [Jan Scholten](#), [Frans Kusse](#), [Massimo Mangialavori](#), [Kate Birch](#), [Vaikunthanath Das Kaviraj](#), [Sandra Perko](#), [Ulrich Welte](#), [Patricia Le Roux](#), [Samuel Hahnemann](#), [Mohinder Singh Jus](#), [Dinesh Chauhan](#).

[Narayana Verlag](#) veranstaltet [Homöopathie Seminare](#). Weltweit bekannte Referenten wie [Rosina Sonnenschmidt](#), [Massimo Mangialavori](#), [Jan Scholten](#), [Rajan Sankaran](#) und [Louis Klein](#) begeistern bis zu 300 Teilnehmer.

## CARCINOSIN: THE NOSODE OF CANCER

Carcinomin, the virus of cancer, also synonym as Carcinosinum, or Carcinosin. This is one of the principal nosode of cancer, prepared as a remedy by Dr. Burnett, an English Surgeon, who recommended this in various psychopathological inherited depravity amongst younger children. Dr. John Henry Clarke, the world famous homoeopath also mentioned this in his 'Dictionary, published in 1900.

Dr. Foubister published its Drug-picture, in the British Homoeopathic Journal, in the year 1958. He recommended this to mentally dull children, in mental cases with a tendency to suicide and a family history of cancer, or with a background of fright, or unhappiness. He described their appearance, as 'cafe-au-lait' complexion, with numerous moles.

He also described their marked sense of rhythm towards music, and love of dancing, and strong sensitivity to reprimand, but sympathy for others. He described this remedy as a constitutional drug, and warned its use as drug to a disease. According to him its contraindicated in cancer cases, but unfortunately majority of homoeopaths have confused and used it on the basis of drug-to-a-disease pattern. In fact Carcinosin is for Cancerous soil or constitution and not for the cancer.

Our studies with Carcinosin show that the constitution of our society covers mainly Calcarea Carb, which has shown forty percent among the problems of present generation (See: Table-1). Homoeopathic doctrines have revealed the typical characteristic of this remedy, that is such individuals show typical features i.e., 'Curry', 'Hurry', and 'Worry'. This is what exactly matches with the modern society. Calcarea is an anti-psoric remedy that

means our problems are building on a very deep miasmatic constitution of Calcarea type. Thus we should apply the principle of cure and prevent such mysterious and difficult diseases of modern time, such as TB, Cancer, Diabetes, and AIDS, etc. which can grow easily on Calcarea soil or constitution. In short 40% population may be treated against such diseases with Calcarea and Carcinosis alone!

When a complacent society changes to competitive one, it gives rise to great conflicts and competition with social values. Thus it also causes a sense of insecurity. This leads to new problems affecting the mankind it is therefore the remedy must also be based on these principles. In my day to day practice what I have seen that the most recently described diseases are affecting a particular group in our society. The victims of one particular sensitive type, are constructive and artistic, but often are drug addicts, homosexuals, womanizers and alcoholics. These people display a typical personality consisting of typical psychology with over-sensitiveness, emotional, sympathetic & honesty. The others are of destructive mentality, like throwing stones to railway commuters, or bullet in schools or nightclubs. Such are rude and arrogant.

In homoeopathy the potentization of a drug is like dynamization by repeated churning as in Ayurveda called as 'Kharal' by which the hidden power of a drug is brought out. But unlike Ayurveda in Homoeopathy the quantity of the medicine is reduced to Minimum, step by step. This results into very high isotropic molecules of medicinal material. In the same way successive dilution can also be made by shaking vigorously. Dr. Foubister the prover of Carcinosis, was first to describe the personality of the Carcinosis, as I described it in the early chapter, that he discovered the effects of this virus by a chance experience while treating two children born to two different mothers suffering from breast cancers, and who were fed with breast milk.

My proving of the Carcinodin was found to be the remedy of an individual having the following personality along with the history of diabetes, cancer or tuberculosis in their family. They possess high-grade morality and conscientious in business work and study with creative talents.

They show sympathy and devotion to the care of others along with great loyalty towards family, friends and social sphere. These individuals are usually artistic in nature, committed, industrious with ability of quick perception and rapid execution of work.

In homoeopathy the selection of the remedy is according to the law of cure 'Like cures Like', then only the drug will act. A carcinodin individual takes life too seriously almost like a struggle. They love travelling, music and adventures in life. To highlight the indication of carcinodin I would like to cite certain examples of my patients who showed dramatic response to carcinodin, which will also make you to understand about the soil of Cancer.

An eighteen-year boy used to frequently visit a beer-bar and there he fell in love with a hostess who used to entertain by singing. The boy became almost mad after the love of the girl and started spending all his money after her. The boy was otherwise innocent well mannered and a trustworthy person. His complexion was dark with numerous moles. The family history of the boy revealed deaths of grand father due to throat cancer and maternal grand father also due to cancer. The study of the craze of this boy resembled with that of a typical picture of carcinodin personality. I, therefore decided to prescribe carcinodin for him. The results were very good, he left going to bar.

The second case of mine relates to one of my students. I also treated his father some time ago for a lump in abdomen. His father suffered from recurrent malaria in the past and when I treated him for the

## **The Proving:**

### **MIND**

1. Anxious with every symptom:  
(3), (1), (5), (11) & (15)  
(Anxiousness was very marked in No.3 as if developed AIDS he shouted in delirium "I have AIDS, don't come close.")
2. Anxiety about his health, with marked fear, that he would die: (3) & (5)
3. Anxiety, marked; when developed fever, (No. 11), (Discontinued, & self medicated)
4. Anxiety and anticipation of relapse, when developed fever: (1), (3), (13) & (15).
5. Became delirious, then unconscious, (when two months low grade fever shot up to 107°F: Next morning regained consciousness with no fever, (curative), passed great amount of urine during delirium, (No. 3).
6. Delusion: "Many persons were inside the room; who have passed that much urine together, along with me," (No. 3)
7. Anxiety with fear very marked, (No.3), asks wife to measure temperature, after every few minutes.
8. Loquacity fever during, like speeches, (3) & (1).
9. Irritable, during fever (3), (1), (15) &(5).
10. Anticipated anxiety, with fear, & timidity every time while appearing before the (TADA) court; after that became bold & fearless (curative), (13).
11. Anxiety of his conscience, with depression and confusion, (said No.7), "People will come to know if not married; and if marry, why to give illness to wife! What is her fault." Cannot decide? Brood in silence. After that his anxiety and depression vanished, he improved, (curative)
12. Changeable mood, weary of life with weeping, cursing, laughing, fault finding, then immediately becomes irritable, (No, 3, & No.5)

13. Weary of life, (3), (1), (5), (2), (12) & (13).
14. Weary of life with weeping (3), (5) & (13).
15. Vivacious, (6) & (11).
16. Aversion to being spoken to, (2) & (5).
17. Loquacity; (3), (5) & (1).
18. Dwells with unpleasant events; (5), (2) & (14)
19. Aversion to meet people; (2)
20. Worried, with trembling with fear, as if would die, (5) His mania of investigating himself, again & again cured, after that.
21. Sympathetic & helping (5) & (4). (No.4. Contracted disease while nursing his cousin, who later died of AIDS.)
22. Indolence, forgetfulness; weak memory, (No.2)
23. Weakness of Brain (sensation), » walking, (No. 12)
24. Violent, become in the court. (No. 13), (A very timid and nervous person; Detainer under TADA, in Bombay bomb blast case), was a case of pyloric stenosis, (? Ca. Stomach Duodenal cap disease), (curative).
25. "Sensation as if I am no where," again and again, as if blown up, (No.5)
26. "Sensation, weakness of mind," > hammering. (No.5)
27. Irritability, weeping, depression, were very marked, in (No.5)
28. Good mood, alternate to irritability and violence, (No.5)
29. Lack of confidence; (11), (5) & (12)
30. Brooding in silence, grief, & depression, (No. 14), cured after this.
31. Depression concentration lost, (5)
32. Desires company, laughs when talk, (14)
33. Weeps & talks to himself (5)
34. Anger (on me), Anger on father, with sighing, (No.5).
35. Violent, for sex, more & more sex, (5)
36. Absorbed sits quietly, (14).
37. Throws thing in anger, (3).
38. Religious affections, (1)& (6).
