PREFACE

Homoeopathy today is a widely accepted philosophy in the field of medical sciences. In less than two hundred years, it has progressed enormously. Volume of work done in the line is huge and vast. A single work by Dr. T.F. Allen constitutes of nine thousand pages in ten volumes. It is learnt that Dr. Pierre Schmidt of Geneva has 4269 books, pamphlets and articles on one drug - i.e. Arsenicum alone. There is a rich and valuable treasure of symptoms e.g. 3370 symptoms of Thuja, 3920 of Phosphorus, 1323 of Pulsatilla, 1040 of Sulphur and so on; and these will prove as a searchlight as long as the human race exists, in the treatment of sickness arising in human body. The founder and the pioneers have dedicated their lives to collect these symptoms available to us. They arranged provings of drugs on their own bodies and also the bodies of other enlightened disciples to get correct results.

In spite of all the developments, and a wide use, there is seen a tendency to shirk from hard work, pick up easy methods - which take us away from the principles and spirit of the philosophy. So, arrangements and rearrangements are the need of the hour, so that the treasure of knowledge may reach the maximum people. Some such features of the system are to be highlighted which could not be developed by the pioneers, keeping in view that spirit of the philosophy is not crushed,

PREFACE

and the progress continues unabated. This is the purpose of my efforts to introduce the new work.

In my previous volumes "Wonders of a Single Dose in Homoeopathy" and "Life Saving Drugs in Homoeopathy" I had tried to bring to light — at one place, under different heads, the achievements made by our masters. In the present book, I have worked upon the difficulties of the present generation and the possible ways that can keep the science advancing to its goal without deviating from the philosophy and its spirit.

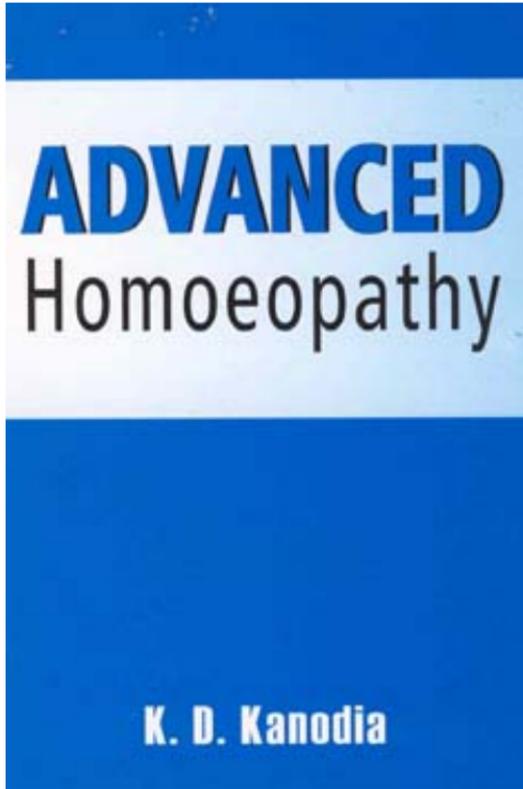

*

If my efforts are liked by the people of profession, I shall feel encouraged.

One thing more. My esteemed readers may find some repetitions, but I found them necessary in the contexts and this I liked to mention here itself. Also, my previous two books require some corrections in the printing errors, but that could not be done even in the reprints. I feel sorry for the inconvenience that may be faced on this account.
