PREFACE

'Modern Medicine' is being modernised every day. What is prescribed as 'the best' today is looked upon as 'highly dangerous' the next day. How fantastic is their modernisation ! Yet they hold their way as scientific.

They say that almost all diseases are caused by viruses, bacilli or worms. And yet in a house where they are in plenty all the member., are not affected. In fact the air they breathe in, the food they consume and the place where they sit in and sleep are infested with their germs or worms. The argument is that those who escape are non-allergic. Hence certain other conditions also work alongwith these tiny creatures.

As answer to this question I am quoting a paragraph from E. A. Farrington M.D. : "The answer is involved in that great unanswered problem of constitution - the soil in which disease is to grow, and by which disease is so materially modified. Hahnemann and Grauwogal gave us each three constitutions, but there must be many more. The physician who daily cauterises the chancre or checks gonorrhoea with injections, is forming a 'constitution' for his patient which will last him through life and seriously impress his offspring. No disease is ever cured except it be removed to the periphery. When we begin to treat our patients according to their several tendencies to disease, rather than according to the acute symptoms only, we will attain an amount of success never yet even dreamed of. Until then let each physician endeavour to make his prescription as accurately as his *Materia Medica* will permit, always valuing symptoms from the centre to the circumference; from mind to body; from more to less vital parts; from function to organ."

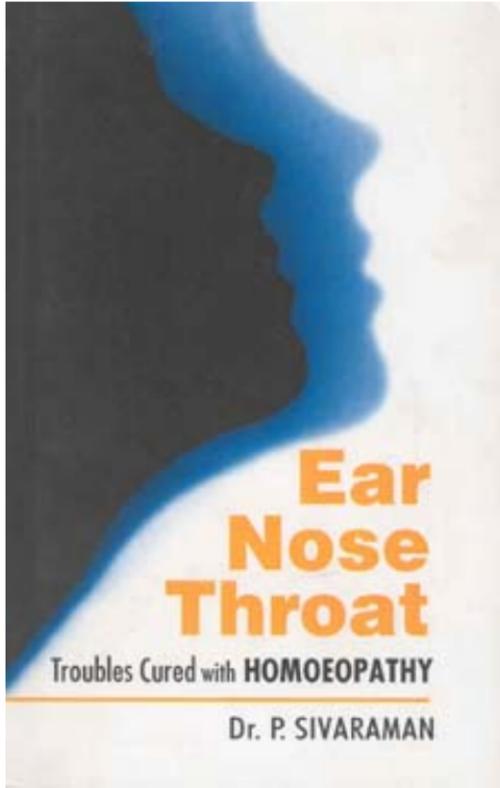

Once it was a fashion to cut away the tonsils. Were all those operations necessary ? By cutting away a part of the body have they not hindered the protective mechanism the nature has given us ? Time has now come that atleast some have understood the folly of their misdeeds. Atleast some are desisting from such interferences.

By compiling this little monograph and placing it before the profession and public I have done something towards the cure of some 'diseases' with medicines. There are many specialists of these organs - ENT- who solely allege the causes of sicknesses to these organs forgetting that these belongs to an individual who was sick before these organs became sick. Because any one of these organs were weak they exhibit more symptoms

and they (specialists) attribute the sickness of the man due to the illness of these organs ! If they could understand that these symptoms are only nature's way of expression and the real sickness is not these, many torturing could be avoided. Set right the man, then these symptoms will disappear automatically.
