MEDITATION

Introduction

This fraction of one's character can be childish and naive or in an extreme manic, one wants to enjoy life and love in an expansive manner, enjoying it in an impulsive way, or one looks for this form of life, and has the feeling that one is prevented to reach this life.

This prevention can be reinforced by one's uncertainty, how far one can go with their necessity for love and freedom. One doubt one's own capabilities to live such needs, which can lead to confusion what one is allowed to live and do, and what not. The result can be a Single existence.

Stage 3: Confusion about what is allowed; Am I allowed or not;

26 CASE

Woman, 35 years, depressions, fears, panic attacks;

She speaks very fast as driven and has a red face. She just had a very good phase in life that had to do with a seasonal work in hospitality. She has experienced so much, has enjoyed her time and felt totally arrived there. There was so much work, no time for superfluous thoughts and private life, she is there completely risen. She got so many compliments, so much admiration and appreciation from the guests. She has given too much, poured out, it was as if on stage, she was so incredibly full of energy. At the end of her seasonal work, the bitter part was her wage, much too little for this drudgery, what was almost around the clock.

Now she is back home and it's the complete opposite, she is back in her shell, and feels totally overwhelmed, with panic attacks, from trivia like fill out applications. Now she feels lonely again, whiling away her lifetime and is confused whether it was all real, that what had made her happy and touched. She

The fierce sadness that has gripped her from deep inside that made her cry rivers, it no longer exists. She says she has found a haven in herself, with the feeling to be finally free. Freedom is the highest. Lithium carb. she had before, it only helped for a while, it covers only subphase 1 and the carbon series themes.
