Preface

This book was written from higher ground - at 11,000m high - on my way to different places around our beautiful planet: Romania, Japan and India.

It is a message of hope in these troubled times, inspired by powerful voices such as the 2000 year-old Word of Christ that still holds true in the depths of our heart. Other masters such as CONFUCIUS, BUDDHA, LAO TSEU will also be mentioned.

Yes, there is a way to find order in the midst of chaos and yes it is possible to find happiness and harmony on Earth. But this will require work, firstly self-development but also teamwork, and finally a global planetary effort.

Here are some thoughts and ideas to inspire us to walk towards this awakened path.

Love, in its three dimensions, is the lighthouse that guides us to the right port and homeopathy is one of the tools that can help us on this journey. May we make full use of this treasure as Gandhi, who knew its potential, said when he announced that 'Homeopathy cures a larger percentage of cases than any other method of treatment and is beyond doubt safer and more economical and the most complete medical science.'

There is no doubt that some will find it surprising to read what they consider as an amalgam between homeopathy,

a serious scientific discipline taught in the best medical schools, and sacred texts which are thousands of years old.

Readers will also be astonished by the presentation of clinical cases that have successfully been cured. They serve the purpose of illustration and, as such, give a unique dimension to this book, which is the minimum one can expect of a homeopath. These observations are not in any way to be taken as formulae to treat other patients suffering from similar pathologies. And finally, one should not conclude that homeopathy could cure every disease encountered: as with all human endeavours, failures happen.

In our Western world, we have been ignoring, under the cover of rational thinking, many aspects of our human nature, whilst suppressing entire aspects of our consciousness. As a consequence, mankind is filled with an anxiety that spurs them into becoming experts at using prescription drugs as well as illegal ones!

Homeopathy does not ignore any of those aspects: the homeopathic repertories include rubrics such as 'see angels', 'talk to dead people' and therefore the homeopath is used to looking into a patient's case all the way to a spiritual level if required.

This book reflects my own research. Modern homeopathy is practiced in several different ways, something to be expected of a discipline that is very much alive and based on principles of similarity and

infinitesimal doses discovered by Hahnemann. All these various schools of thought are highly respectable and each offers their own way of understanding the patient and their disease.

Amongst the different schools of thought, some homeopaths such as the Argentinian A. Masi or the French M.L. Fayeton, have been interested in the transcendental aspects of human beings. For me, I developed an artistic and symbolic approach to remedies in my first book 'The Spirit of Homeopathic Medicines', and a more philosophical approach to life in my second book 'Homeopathy for Life Stages'.

This new essay is in some way the continuation of my previous publications. This work is aimed at introducing the general public to the spiritual dimension of homeopathy.

As for the Word of Christ, after having read many books of 'initiation' written by the most enlightened masters, I have realised that these Words offer the deepest insights, compassion and simplicity and I recommend to those who like this book, to read or reread the Four Gospels.

Finally I would like to thank those who have supported me in this work, Helene, Catherine, Anne-Marie, Dominique, Collette, Michel, Pierre Henri, Frederique, William, Jean Louis and many others...
